

Vote for Bob Panter

Rushford Lake Recreation District Commissioner

★ ★ ★ *Continuing to Focus on Landowners Concerns* ★ ★ ★

Your Vote will enable me to continue to ensure that your voice is heard!

As Owner and President of a large electrical contracting business in Hornell, NY for over 40 years, I have a solid construction background. For 18 years I have also served the community as a Town of Hornellsville Councilman and Chairman of the Hornellsville Planning Board. I am the past President of the Hornell Rotary and a 15-year member of the Board of Directors of the YMCA. While residing as a summer resident in the Lake District for 70-years, I have played an active role in the community as:

- Current term RLRD Commissioner (seeking re-election)
- Member of Rushford Lake Landowners' Association for over 46 years
- Area J Director for the past 13 years
- Chairman of the Right-of-Way Committee to prevent ROW takeovers in District
- Working member on Committee to Save Rushford Lake (as RG&E divested interest)

Together, this experience has taught me that each and every person should be treated equally and fairly. This is especially true in the role of District Commissioner. I believe that the Rushford Lake Recreation District (RLRD) had previously moved away from being "lake resident centered." However, during the last three years, I have worked with the elected and appointed Commissioners to bring about change – we now have an experienced and cohesive working Board that is accomplishing good things and each member recognizes their responsibility to serve the needs of the landowners.

When Elected, I will...

- Continue to make the Caneadea Dam maintenance and operation my top priority and provide hands-on assistance in any way I can; keep that landowners informed and up-to-date with issues
- Focus on aging lake issues such as water quality, silt build-up, invasive species and boat/dock over population and establish clear, concise and fair policies and procedures
- Strengthen relationships with Town, County and State officials and agencies

As Commissioner for the Caneadea Dam – accomplished or working on the following items:

- Installed new Roof on dam gate house
- Prepared for new valve installation
- Purchased and installed a new, heavier jib on the dam
- Repaired valves as a stop-gap to buy time
- Maintained mortar and concrete work
- Established road access behind the dam for new valve installation
